SHOWCASE

Perry Monument – Erie, PA, USA

Overlooking Lake Erie on the peninsula of Presque Isle, the Perry Monument stands proud as a commemoration to American naval commander Oliver Hazard Perry on his victory over the British during the War of 1812. Constructed in 1926, the 101 foot, concrete, obelisk-shaped monument now features a dynamic LED lighting solution, replacing the outdated metal halide fixtures. Illuminated by Traxon Wall Washer Shield AC XB RGB, the monument is washed in a broad range of rich colors and is highly visible from over a mile away on the mainland. Controlled by e:cue Butler XT2, the solution offers a color changing sequence, transitioning from warm white to seasonal colors for eight different holiday displays. The stand-alone set-up requires no intervention, and operates on a sunset timer, however e:cue Mobile Action Pad is also integrated to allow onsite park personnel to select colors as desired. The simple, yet powerful and durable installation is an excellent addition to Presque Isle State Park, to be enjoyed by the over four million visitors who come to the park each year.
