SHOWCASE

Saint Thomas A' Becket Church - Jefferson Hills, PA, USA

Established nearly 50 years ago, Saint Thomas A' Becket Church in Jefferson Hills, Pennsylvania features an impressive backdrop for the altar of the recently constructed church. Designed by Pittsburgh architectural firm Astorino, the layout of the 750-seat church fosters a sense of community amongst parishioners. The drape-like wall behind the altar is designed to reflect the Priests' Vestments. To highlight the curves of the large wall, the compact, yet powerful Traxon Wall Washer XB RGB was selected to provide a rich, even wash in a variety of colors. Ideal for sophisticated, concentrated bright light output, Traxon Wall Washer XB RGB's anodized aluminum finish acts as a natural heat dissipation system resulting in longevity of the fixture. For Saint Thomas A' Becket Church, the light color can be changed to reflect the occasion, as well as to match the colors of the Liturgical Season.
