## Liner Quattro AC XB RGBW

Intelligent & powerful wall washing and facade lighting.

With precision optics, Liner Quattro AC XB RGBW is a powerful but energy efficient, full-color RGB plus W IP66 rated outdoor luminaire designed for architectural colour-changing facade lighting and outdoor high brightness flood lighting applications.

The intelligent and powerful outdoor LED Liner Quattro AC XB RGBW provides superior close-field color mixing and light performance suitable for urban and tough environments with a variety of beam options ranging between 13°, 60°, 30°x15° and 75°x40°. The flexible luminaire mounting allows the Liner Quattro AC XB RGBW can both be used for wall washing and facade lighting applications, while guaranteeing a vast light output of 1494lm (600mm) and 2922lm (1200mm). With active over-temperature protection, Liner Quattro AC XB RGBW enjoys a longer LED lifetime compared to other luminaires in its category. Remote Device Management, simple configuration and addressing makes it an easy to install and maintain luminaire for powerful illumination of office buildings, shopping malls, bridges, hotels and stadiums.

**INTELLIGENT** DMX control with Remote Device Management, with easy configuration and auto-addressing capabilities.

**POWERFUL** Linear illumination with super consistent light and close-field colour mixing of 16.7 million RGB plus W colours.

**LONGER LIFETIME** of luminaries through active over-temperature protection.

Technical Specifications & Options

ENVIRONMENT

TECHNICAL SPECIFICATIONS

LUMINOUS FLUX	1,494 lm (600 mm / 2-ft) and 2,922 lm (1,200 mm / 4-ft)
EFFICACY	34 lm/W
INPUT VOLTAGE	100 - 277V AC input
POWER CONSUMPTION	46 W (600 mm / 2-ft) and 85 W (1,200 mm / 4-ft)
OPERATING TEMPERATURE	-20 - 50°C
POWER FACTOR	>0.9
CONTROL	DMX512 with RDM and auto-addressing capability
