

# SHOWCASE

Worldplace - France

Only a short hop from Champs Elysées revellers are constantly swarming to one specific and dazzling spot to spend their nights: The Worldplace – Paris. Already eye-catching from the outside, the place has been highlighted by Traxon’s Wall Washer XB-36, illuminating the building’s exterior walls 20 meters up to the sky.

For the redecoration of the lounge interior Traxon contributed with its outstanding lighting systems: Every night Traxon’s Tile 64PXL Matrix ensure the perfect atmosphere and entertainment, displaying pre-programmed & live controlled animations by the VJ. Endless sparkling light effects, messages and glittering colour moods create a unique ambience that can be easily adapted to the look of any special event. The panels are arranged in vertical groups connected by horizontal lines at the bar and at the DJ-booth. A special plexiglass variant with stylish mirror effects is mounted on top as part of the innovative concept proposed by “Interdits de Nuit”. Formerly known as Mandalaray or Manray, the place is more popular than ever, attracting the Who’s Who of the Parisian scene for having dinner or just dancing and celebrating all night long.
