

SHOWCASE

London Restaurant - Israel

Traxon equipped the London Restaurant with a major lighting installation that covers 90 sq m/ 970 sq ft of walls of the restaurant. The installations consisting of Traxon Nano Liner XB mounted behind opal glass surfaces, a type of glass that blends from being translucent to white, with a grayish-bluish tint. The installations illuminate various areas of the restaurant and create a particularly decorative ambience. Traxon Light Management enables easy programming and various color displays of the Nano Liner XB. From gentle and subtle ambience to flashing and dazzling lighting, a wide range of lighting scenarios can be programmed. The semi-translucent opal glass cover disperses the light smoothly and gives a harmonic touch to the elegant look of the restaurant.
