

# SHOWCASE

Le Meridien Etoile - Paris, France

Located on the right bank of the Seine and only steps away from the legendary Champs-Élysées, the Le Méridien Etoile Hotel offers rooms for up to 1,200 guests. A new highlight is their “forward thinking” executive guest rooms with cutting edge technology allowing the guest to navigate the world in a whole new way. The rooms are designed to create a stimulating environment where light plays an essential role. The designer Jean-Philippe Nuel chose the innovative Traxon 16PXL Board RGB to give the guest the freedom to lend their room the desired atmosphere. In collaboration with Studio Maramoja, Traxon's Board is mounted behind a stylish sleek mirror surface on the wall -- perfectly blending with the room's elaborate design. The 16 high performance LEDs of each board evenly spread their light in a wide angle of 120° , bathing the surroundings in a beautiful sea of colorful light. Contemporary design features enriched with Traxon' s versatile light source promises the guest a unique experience for their senses.

FEATURED PRODUCT

16PXL Board RGB

METHOD OF CONTROL

Micro Server
