Park Plaza Victoria Hotel – The Netherlands

The Park Plaza Victoria Hotel is located among some of the most remarkable historic buildings in the heart of Amsterdam. For its recent renovation, the 4-star hotel chain assigned Traxon to equip its different facilities with its high brightness lighting fixtures 'XB Luminaires'. In order to meet the Hotel's design concept, Traxon took advantage of the XB Luminaires' high degree of customization; in fixture length, beam angle, lens, extrusion size, IP rating, LED type and color. The DMX controlled Liner XB fixtures that lighten the curtains of the restaurants and bars of the hotel, display various color shades at different times of the day and influence the atmosphere of each venue. For the Art Nouveau glass dome in the lobby, Traxon installed its Wall Washer XB for a rich coloring of this entrance eye-catcher, accentuating the exceptional cupola and illuminating it in a variety of pre-programmed colors.
