

# SHOWCASE

27 Union Square - New York, USA

The lobby renovation at 27 Union Square enlivens the existing marble-walled and terrazzo-floored space from the 1970s by inserting glowing trapezoid-shaped light boxes over three planter niches. The light boxes, which are along one wall and fold up onto the ceiling, are made of a highly reflective translucent acrylic material. LED lights placed in the niches behind the material illuminate the boxes with a gradually modulating scheme of vibrant colors that moves from one box to the next. A new concierge desk made of metal-colored plastic laminate covered by translucent glass completes the refurbished lobby.
